Thanks, sorry for the confusion. Will put you in as the One PFAS POC To Rule Them All (for R7 at least...) and trust you to forward as appropriate.

Hi Andy, I know it's a little confusing, we've had several change of hands over the last year with PFAS. Danny is now the Superfund only PFAS contact, we have a RCRA, Air, and Water program contact too. Jeff Robichaud, Director of R7 water Division is our senior PFAS lead and I am the R7 PFAS lead...so I (and Jeff) should get the important information and I can funnel it through the right people.

Thanks for asking...we all try to coordinate the best we can, but Danny is an RPM and he's out in the field a lot. Richard Dixon, who's name you see periodically, is our genius IT/data guru.

Hi Catherine, here is the whole original data call.
Should I have included you instead of Danny? Are you the regional PFAS POC? My apologies if I muffed it...
Thanks, Andy

Subject: Request for data on Regional PFAS Places of Interest - reply requested by 13 December 2019 to PFASData@epa.gov

Regional PFAS Contacts:

As I mentioned on the EPA PFAS Coordinating Committee call this week, we are looking to update and incorporate Regional information into a cross-Agency list of PFAS Places of Interest for incorporation into the public release of the National PFAS Data Explorer (previously known as the PFAS Analytic Tools). The beta version of the public PFAS Explorer tool is available at the link below. We are still addressing some internal agency issues before starting the rollout, which will include briefings for you and other EPA staff prior to public release (which is currently anticipated for FY 2020 Q2).

Ex. 6 Personal Privacy (PP)

The starting point for the list is information that had been previously reported to OW (Hannah Holsinger). The process of developing a consolidated list is outlined in the attached documents. Specifically, this request relates to PFAS Places of Interest based on Regional drinking water concerns (and are not part of the OLEM/Superfund list). The attached spreadsheet includes a list of known, previously reported Regional places of interest. Via this email, we are requesting that you assist in completing data fields, as appropriate, filling in the relevant columns in the spreadsheet. If you now have additional sites that you would like to add, please feel free to add rows to the spreadsheet and provide the requested data.

This information will be incorporated into the public release of the National PFAS Data Explorer (previously known as the PFAS Analytic Tools), so please ensure that the information suitable for making public and is written for a public audience. Please see the attached document for more guidance on how to report.

We are asking for the data by December 13th, but if that presents a problem or if you have other questions, please contact me so we can discuss. Please send your completed data sheets to PFASData@epa.gov with a copy to me.

Thank you for your consideration, best regards, Andy (on behalf of the PFAS Explorer Development Team)
